

DIVING FIRST AID FOR PROFESSIONAL DIVERS

Sunday, April 30, 2017

Blue Octopus Scuba

4154 Duke Street, Alexandria, VA

9 a.m. to 5 p.m.-ish

No, you don't have to be a dive "professional" to take DAN's most comprehensive dive preparedness program. Originally designed for scientific divers, DFA Pro is now open to all divers who want to be more confident and prepared to handle a range of dive emergency situations. DFA Pro satisfies the CPR/First Aid prerequisite for PADI Rescue, Divemaster and other courses and also meets OSHA's workplace requirements. DFA Pro combines four DAN courses:

-  CPR Health-Care Provider with First Aid
-  Neurological Assessment
-  Emergency Oxygen for Scuba Diving Injuries
-  First Aid for Hazardous Marine Life Injuries

Course fee of \$225 includes 2017 revised course manual, slates for all four component courses, course supplies and DAN certification card. PADI Specialty Certifications also available for O2, Neuro and Hazardous Marine Life for \$38 PADI processing fee each.

Divers completing DFA Pro who hold a Rescue or higher certification may apply for recognition as a DAN Diving Emergency Specialist (\$20 application fee), which includes

- Waterproof Diving Emergency Specialist certification card;
- DES certificate; and
- DES shoulder patch

Contact DAN Instructor Trainer #11511 Earl Glock for details Earl@BlueOctopusScuba.com.
